- 7/ The Unprecedented Amplifier : $DG \times DC = \text{superABUNDANCE}$
- 8/ Everyone's R.O.L.E.™ in The Resonance®

◇

In 1620, Francis Bacon called for an escalation of purpose for civilization when he published "Instauratio Magnus" (The Great Restoration). In doing so, he ushered in 'The Enlightenment'.

In 2019, Garrett Smith introduced The Resonance®, raising the bar of Quality of Life for the whole world. This report on 'The Greatest Restoration' is a practical how-to manual for the key to unleashing the greatest epoch in human history.

1/ The Heart of Restoration IS The Art of War

"What enables the wise sovereign and the good general to overcome others and achieve things beyond the reach of ordinary men is foreknowledge." - Sun Tzu, "The Art of War"

"Harbinger" = somebody or something that foreshadows or anticipates a future event ... Old French, herberger, herbergier, "provide shelter for an Army"

There is Advantage in Prescience. It is our privilege to seize it.

To effectively use this key, start by simply understanding the accurate definition of a ubiquitous word: apocalypse. Contrary to modern hysteria, the Greek 'apokalupsis', and the Spanish 'apocalipsis' retain the real and simple meaning: "revelation". From this position of accuracy, we can then see clearly that the prophecies/foreknowledge (promises to be revealed) are so good that aligning with them is the most exciting and invigorating way to live, by far.

"Adonai does nothing without revealing His plan to His servants the prophets." - Amos, the Tekoan shepherd, Chapter 3 verse 7, c. 755 B.C.

"About the time of the end, a body of men will be raised up who will turn their attention to the Prophecies, and insist upon their literal interpretation, in the midst of much clamor and opposition." - Sir Isaac Newton (1642-1727)

"Heaven must receive Him until the time of the Restoration of all things that God spoke about long ago through the mouths of His holy proponents," - Mark, Acts 3.21 (64 A.D.)

So, the core promise is the revelation of restoration. Compare these for synchronicity:

"... those from every tribe and tongue and people and nation, You have made them for our God a kingdom and rulers, and they will rule upon the earth ... they will be rulers with God and The Messiah, and they shall reign with Him for a thousand years." - John @ Patmos (95 A.D.), Revelation 5.10 and 20.6

vis-a-vis

"Upon suffering beyond suffering, the Red Nation (Rojo Eberim) shall rise again, and it shall be a blessing for a sick world, a world filled with broken promises, selfishness and separations, a world longing for Light again. I see a time of seven generations, when all the colors of mankind will gather under the sacred Tree of Life and the whole earth will become one circle again." - Tashunca Witco, a.k.a. 'Crazy Horse' (1849-77)

Taking another queue from Amos 8.11, the war is really against lack: famine, drought and ignorance. Polymathic Consiliency says, "Destroy all 3 simultaneously with the weapon of Abundance: food, water and the Truth of the Promise."

In a telling foreshadow, the 'Promise of Progress' programme by Economist Impact and sponsored by Franklin Templeton identifies 4 Transformative Technologies. Most relevant to this discussion is 'blockchain', the software protocol behind secure digital ledgers.

We will best understand the power of blockchain by applying it in order to manifest progress. As Marijo Moore, indigenous American author, wrote, "The world is changing, but old ways can be modernized. That is the way of growth."

Ultimately, this real-time 'how-to' reference is a key to synchronizing with the promises by aligning with the trends. And to lead into the future, we must step in front of today.

2/ FutureMAP

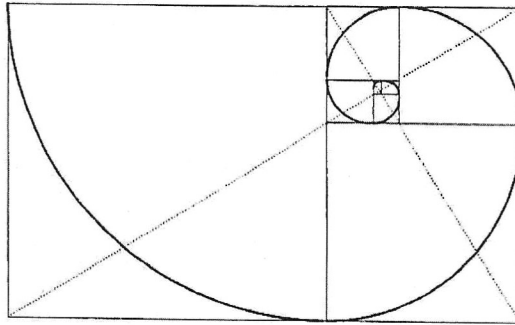

Parag Khanna, world renowned geo-political economist and FutureMAP Managing Partner, defines prosperity as living in a society organized as a performance-based Technocratic Meritocracy (a culture organized around good science and an honorable work ethic). On genetics, blockchain, sensor networks and telemetry, he writes, "Success and Advantage will be determined by those who best scale new technologies and business models."

From this point of view, pay close attention to the accelerating global fusion of 2 cutting-edge visionaries, one a pioneer in applying networked computing power and the other a vanguard of vigorous resource stewardship.

If the dynamic convergence of prescient ideas draws the map of the future, then the alliance of Vitalik Buterin of Ethereum and Garrett Smith of Concentric is drafting the premiere World Atlas in real time, today.

Concentric & Ethereum

The Nexus is Efficiency: the Necessary Essence of Decentralization.

The Mutual Diesellian Aim:

to Create Solidarity via globally-distributed Stake in universally-relevant technologies

3/ Two Great Parallels Converging ... to Create the NSC®

° DC = Distributed Currency => decentralized capitalization for the human race

With state-of-the-art fluidity, Ethereum was established in 2015 by Vitalik Buterin to move anything of value with efficiency under the structured security of SOLIDITY - the special-purpose programming language - on the globally-networked internet with its massive, independent and autonomous computing power.

Ethereum IS the future of independent money for the masses - cryptocurrency that is safely encoded. DC and Ethereum represent access to money not just for the elite, but for the everyman.

° DG = Distributed Generation => Vital Commodities in Available Abundance

In the paragon of superabundant technical meritocracy based on employee-owned, diverse, proven and patented pureTECH, Concentric Industries was founded in 2012 by award-winning engineer Garrett Smith, P.E. featuring natural science elegance "Representing the Future of Energy, Food, Air and Water for the Whole World"™. (www.ConcentricIndustries.net)

DG by Concentric equates to sustainableLIFE™, worldwide.

The convergence of the ideals and the companies of Buterin and Smith is momentous because, "A decentralized stablecoin is the Holy Grail of De(centralized)Fi(nance)," as explained by Cyrus Younessi, head of risk management at MakerDAO. "If you could take those assets, extract stability out of them, and productize it, then that's huge."

That's precisely what Concentric's Nautilus Stable Coin (NSC®) is - "Commodities Ubiquitous Bonding Equity Securities" (C.U.B.E.S.™) - the world's first Universal Utility Coin (UUC):

° STABLE because NSC® is backed by the most globally-ubiquitous commodities - Energy, Food, Air and Water - produced at lowest-in-class costs via proven and patented pureTECH that epitomizes the "TRUE" / Total Resource Use and Efficiency / Program with Concentric's "No Waste Wasted"™ imperative,

° STABLE because those assets foster totalPROSPERITY in all 4 directions - Economic Abundance + Ecological Stewardship + Social Equity + Spiritual Liberty,

° STABLE because NSC® is regulated and optimized decentrally by transparent blockchains in Ethereum running on Solidity,

° STABLE because NSC® is governed by secure and efficient 'smart contracts' crafted as unique 'Stablized Agreements for Fungible Tokens', SAFT^N(autilus), "SAFT to the Nth degree™" that are, at last, backed by real, abundant and universally-vital commodities,

° STABLE because NSC® is founded on tekhnETHIC™, the intrinsic morality of pure technologies created to deliver continuously optimized solutions to civilization's most serious and borderless challenges - hunger and dehydration, pollution and poverty, and

° STABLE because it's the streamlined trading of performance-based value, a real, measurable "Brix and MohrTar"™ value that's unprecedented ... until now.

4/ The MegaTrend IS Efficient Decentralization

Parts 5 and 6 below offer a primer, of sorts, on the nascent technologies that Ethereum and Concentric are built upon, but remember that the MegaTrend - the harbinger to synchronize with - is about RESULTS (the 'Why').

Of course, the Process (the 'How') is pivotal, but the NSC® is still just a tool (albeit the most powerful one in the history of commerce).

The substance of the key to Distributed Prosperity is investment cast in EFFICIENCY. Because whenever and wherever per-transaction costs are reduced, then power and freedom are restored to the people.

Economy-of-Scale is a real challenge. The ONLY way to overcome it in a decentralized or distributed network is by being more efficient in 2 critical areas: (1) the production of Energy, Food, Air and Water, and (2) the equitable transfer of currency in exchange for these core commodities.

Herein is where this early 21st Century convergence of Concentric and Ethereum is profound.

Concentric is the result of the relentless professional application of great science to the resource frictions of the day. From zeroPOLLUTION fuel optimization and waste conversion to pure food cultivation, it is the manifestation of better ways to meet humanity's basic needs.

Ethereum represents the apex of state-of-the-art digital technologies applied to currency (consensus). It is the manifestation of the promise of blockchain progress.

The merger of the ingenuities of Buterin and Smith is unprecedented.

For Smith, from the AdVantage Point of record-setting purity and efficiency, scaling up 'multi-purpose-engineered' systems amplifies the value of being low-cost-producer, while the network of 'right-sized' power and water treatment plants, factories and farms creates effective volume and mammoth scale.

This exponential savings is intrinsic to the modular designs themselves (CHPC, P.R., aquaZOE™, vertical farming, SOSCO™, Atlas, Kemiya, etc.) because they are, by precise elegance, readily increased in the number of pre-engineered units per site, and number of sites per region. Therefore, Operations and Maintenance costs plummet even more among the fleet of standardized projects.

In this streamlined way, the simultaneous increase in Efficiency, Purity and Financial Gains provided by the distributed fleet of worldwide operations augments the social worth of strategic decentralization.

Variegated acronyms in the energy and natural resource industries are aiming to arrowhead this MegaTrend in the ubiquitous commodities of Energy, Food, Air and Water:

- DG = Distributed (Power and Water) Generation
- DH = Distributed Harvesting
- The 7Os on The 7Cs™
(The Seven Optimizations on The Seven Continents')
- AIA = Advanced Integrated Aquaponics
- AIRI = Autonomous Island Resource Independence
- HUR™ = Hydraulic Ultra-Renewal
- RD FAC™ = Refuse-Derived Fuel and Cement
- TD FAC™ = Tire-Derived Fuel and Carbon
- CMB RAC™ = Cosmic Microwave Background Resonate And Capture
- SOSCO™ = Sustainably Operating Self-Contained Outpost
- PID = Positive Impact Dairying
- ROLE™ = Restoration of Life Everywhere
- C.U.B.E.S.® = Commodities Ubiquitous Bonding Equity Securities
- SAFT^N™ = Stabilized Agreements for Fungible Tokens to the Nth (Nautilus) Power
- NSC® = Nautilus StableCoin
- UUC = Universal Utility Currency

For Buterin, from the AdVantage Point of secure digital finance operating across a globally-networked internet with massive independent and autonomous computing power, real-time transactions are Efficient, Fair and Transparent. Certainty, Predictability and Uniformity have been listed as essential values of Law. Ethereum raises that 'BAR' by embedding these values into corporate structures that ensure economic justice.

Ethereum embodies 'money without borders' in resonance with Liberty that, itself, is what's 'too big to fail'. Ethereum is the global paragon of decentralized commerce because it sustains currencies that are 'Safely Encrypted', NOT 'fraudulently hidden'.

Uniquely, through Ethereum, as programmed in Solidity, digital money not only connects to reality, but also amplifies it in synchronous alliance with Concentric's "Brix and MohrTar"™ real tech that cultivates real Energy, Food, Air and Water commodities around the world.

In this unprecedented alliance, the NSC® is the vanguard of the burgeoning Paradigm Shift to "Natural Asset" tokens that are fungible in performance because they are intrinsically linked to the real value of real products.

Through bona-fide 'smart contracts' programmed in Solidity in the Ethereum state, CONCENTRIC DAO amplifies the SAFT "to the Nth Power" ('N' is for Nautilus) by minting 'Stabilized Agreements for Fungible Tokens'. NSC® are inherently stablecoins because they are intrinsically connected scientifically AND algorithmically to ubiquitous assets of clean Energy, Food, Air and Water across the planet.

Concentric plus Ethereum represents the new frontier of blockchain potential. The Blockchain Revolution is catalyzing the harbingers - the foreshadowing of future events - of what George Gilder of The Discovery Institute calls the 'CryptoCosmic Explosion' of Creativity, Learning, Knowledge, Risk-Taking, Re-Investment and Sustainable Thriving. Because cryptocurrency plus blockchain backed by Real commodities Restores the freedom to create to the individual and Resonates with the ingenuity of the human spirit.

Every new day opens doors of opportunity for the Possible.

Possibility is the future.

And with Concentric merged with Ethereum, the future is now.

5/ The DAO (on a Blockchain in the Ethereum state running in Solidity)

The Decentralized Autonomous Organization (DAO) in Ethereum is the most powerful business construct, ever.

The power-packed nexus of Concentric with Ethereum is manifest through the corporate construct of the DAO. The DAO was legally recognized (like C-Corp., S-Corp., LLC, etc.) in the US State of Wyoming on 7.1.21 by Act 73 / SF 0038. The DAO is elegant - ingeniously neat and simple. It is "Future Nostalgia": 7.1.21 is the day the kosmos of fiscal consensus changed, for the better.

Now, for a basic primer:

◦ Decentralized Autonomous Organization (DAO)

DAO is a business entity represented by rules encoded as a transparent computer program (e.g. 'on a blockchain in the Ethereum state running in the Solidity language') controlled by the Organization's Member/Owners and NOT influenced by a central government.

DAOs are typified by the high-efficiency, low-overhead use of open-platform blockchain technology to provide a secure digital ledger to track electronic interactions across the internet, hardened against forgery by trusted time-stamping and dissemination of a distributed database. The blockchain approach enables multiple cloud-computing users to enter peer-to-peer smart-contract collaboration previously impossible in commerce.

A DAO's financial transaction records, including Initial Coin Offering (ICO) terms, and program rules, are maintained on a blockchain for transparency. Blockchain inherently enables that real-time recording of automated, trusted transactions and value exchanges in a secure environment that is structured that way, by design, so that aligned people with purpose-driven ideals can work together safely and efficiently around the globe.

In Navajo, the imperative word is "hozho", or 'walking in harmony'. Gung-Ho is derived from the Mandarin Chinese "honghe" meaning 'work together' with alacrity. In Spanish, solidity is "dureza", conjuring images of durable zeal. "Solidity" resonates with 'Solidarity'. The etymology, lexicology and cryptology are consistent because words have meanings. And the DAO means 'All Gain Sum'TM annihilates the 'zero sum game'.

◦ Smart Contract

A "Smart Contract" is an automated transaction defined in the "Uniform Electronic Transactions Act" and codified, for example, in Wyoming's W.S. 40-21-102(a)(ii), which is comprised of programming language (e.g. SOLIDITY) that automatically executes the terms of a transparent agreement, which may include taking custody of and transferring an asset (e.g. a secured NSC®), administering membership interest votes with respect to a DAO (e.g. ConcentricDAO), based on the occurrence of specified conditions (e.g. confirmed ownership of SAFT^N NSC® tokens granting voting powers in ConcentricDAO). Provenance of Ownership interest in the DAO is automatically and securely memorialized.

° ETHEREUM

A blockchain-based decentralized cloud-computing protocol created to securely execute any commercial transaction efficiently and transparently. The token 'Ether' is usable as an "oil for the network", and is NOT an 'asset' itself (like BITCOIN).

° SOLIDITY

Solidity is an object-oriented, statically-typed, high-level scripting language (in the tradition of Pascal, Ada, C, C++, C#, Java, Python, etc.) for implementing Smart Contracts - programs that govern the behavior of accounts - within the Ethereum state.

Just as in Apple, an APP is run in iOS, in Ethereum, a dAPP is run in the coding language of Solidity.

6/ Concentric C.U.B.E.S.® manifest as The Nautilus Stable Coin (NSC®)

C.U.B.E.S.® (Commodities Ubiquitous Bonding Equity Securities) manifest as The Nautilus Stable Coin (NSC®) is the nexus where advanced natural science by Concentric meets leading-edge blockchain token architecture by Ethereum. The result is an asset-backed currency that is real and performance-based.

NSC® are inherently fungible not just because they are continuously tradable under smart contracts, but also because they are really supported by real commodities that are continuously made by real technologies.

Hence, the term 'SAFT^N™' to describe the Stabilized Agreements for Fungible Tokens, to the Nth (or 'Nautilus') degree. These e-coins automatically arise upon procurement and are automatically recorded (legally "Attached" and "Perfected" in accordance with Uniform Commercial Code standards) on a secure and transparent blockchain programmed in Ethereum on an algorithm running in the Solidity language.

In this wholly integrated way, the NSC® is the world's first Universal Utility Currency (UUC).

The member-owned ConcentricDAO fosters simple, transparent Commonwealth with unique utility by enabling anyone in the world to own the world's best technologies for meeting the world's most primal everyday needs.

NSC®'s are, in essence, bonds secured by interest in real, specific corporate pureTECH assets (C.U.B.E.S.®).

In the epitome of ubiquitous Solidarity, owners of NSC® own real commodities backed by real assets, and have ownership voting rights in promoting their deployment and value.

Quantitatively, Concentric's broad fleet of pureTECH includes current contracts for hundreds of billions of dollars (USD) in deployments crafted to earn 30%+ Return On Investment (ROI) across all 7 Continents. In light of the multi-trillion dollar (USD) worldwide scope valuation for Concentric's Intellectual Property, all integrated with Ethereum's leadership position in omnipresent cryptocurrency, the merge of DG x DC truly creates unlimited opportunity for unlimited renewal of Quality of Life: the Promise.

Best of all, decentralization via blockchain in the Ethereum state streamlines the inclusion of anyone and everyone who simply desires to participate in the planet's most uber efficient generation and cultivation of abundance.

That's why the NSC® is manifestation of prophecies. That's why it's the "Holy Grail" of MegaTrends.

7/ The Unprecedented Amplifier : $DG \times DC = \text{superABUNDANCE}$

This simple function captures the gist of amplified Quality of Life. Concentric's uber-efficient, uber-clean, and uber-productive methods for creating Energy, Food, Air and Water merged with Ethereum's dynamic leadership in cutting-edge currencies equates to unprecedented superABUNDANCE.

The alignment of Buterin and Smith and their organizations catalyzes exponential amplification. Optimizing Concentric's optimized engineering ingenuity by streamlining the accessibility of ownership in the vanguard company is the key cut uniquely to fit by Ethereum.

ConcentricDAO is the paragon of a Compassionate Meritocracy because it is ingeniously and intrepidly focused on the core metric of civilization: the measure of how people deal with their wastes, and with the sick and unable.

ConcentricDAO is also the paragon of a 'Mutual', a jointly-owned association, because it efficiently opens up the opportunity for all people to play a meaningful and beneficial role in that worthy cause.

That's why ConcentricDAO running in Solidity IS the catalyst (ZARAZ) and the harbinger (PROPHECY) of High Quality Life on earth.

8/ Everyone's R.O.L.E.™ in The Resonance®

Restoration Of Life Everywhere (R.O.L.E.™) is the aim because it is the prophecy, the foreknowledge that is advantage. This power of prescience is embedded in many languages:

- Latin, Instauratio / renewal, regeneration
 - Hebrew, Yakatz / Arise
 - Russian, Perestroika / reconstruction, rebuilding
 - Hebrew, Tikkun Kol / Restore All
- Tikkun Olam Hazeh / Repair This World

Ultimately, this is about embracing a worldview of imminent regeneration of Original Edenic Intent and our responsibility to steward people and the planet. Genesis is all about 'tending the Garden', 'increasing and multiplying', about 'inhabiting with abundance'. Those callings are irrevocable.

These are duties that we 'get' to fulfill. We have mutual responsibility and we 'get' to thrive. These are the constructs of really living, and they are the constructs of ConcentricDAO that are only possible in the confines of Ethereum.

Right now, in ingenious ways previously non-existent, we hold in our hands the greatest business toolkit in history, the DAO of Concentric in Ethereum, to revolutionize Quality of Life for all people.

The promise that is the prophecy of Restoration is alive because everyone really can participate.

Truly, The Resonance® has begun, and truly, you can join it.

{ the end of the beginning }

**“It is cathartic to restore something once broken.
It is bracing to improve it.”**

J. Garrett Smith, P.E.
Chief Technology Officer
ConcentricDAO
