

**UNPRECEDENTED  
STEWARDSHIP  
TECHNOLOGY**

# **CONCENTRIC PRIMER**

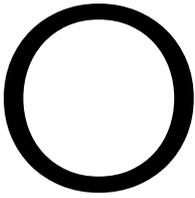

# CONCENTRIC PRIMER

**W**hat makes Concentric the unprecedented commercial group that it is?

Far more than just a power generation innovator, Concentric **"Represents the Future of Energy, Food, Air & Water for the Whole World"™**.

We bring 4 decades of advanced and award-winning natural science solutions to the world's most ubiquitous problems, including:

Hunger & Dehydration,  
Poverty & Pollution,  
Disease & Climate.

ur 20+ patents are essentially sorted into 2 main branches:

- **NAUTILUS ENERGY ALLIANCE (NEA)**
- **KALOS FOOD HOLDINGS (KFH)**

**NEA** includes “The Seven Optimizations”<sup>TM</sup> on The Seven Continents (The 7Os on The 7Cs): comprehensive and truly pollution-free techniques for efficiently converting everyday fuels and wastes including coal, geothermal heat, woody biomass, oil & gas, livestock manures & food processing wastes, scrap tires, and Garbage & Sewage into electricity and clean water products.

On its own, the NEA is the most comprehensive thermodynamic Toolkit in Human History for energy transformation.

**S**till, Concentric takes all of this to a whole other level altogether with KFH.

By integrating the by-products, or what are typically referred to as ‘wastes’, of energy conversion, like heat and carbon dioxide, into optimized food production, Concentric really goes right after life’s major challenges.

**KFH** primarily consists of:

- **AUROS Land + Cattle Company**
- **PHAROS Marine + Fish Company**

AUROS provides a truly zero pollution, completely self-sustaining technique for uber-efficient animal husbandry for any species of livestock, from camels, to cows, to goats, to chickens.

**F**urthermore, at scales and efficiencies never realized before in the history of mankind, PHAROS utilizes electrical and thermal energy from any NEA process to radically optimize **Controlled Climate Agriculture (CCA)** via **Advanced Integrated Aquaponics (AIA)** to grow **50** times more quality foods using **95%** less land and water than traditional farming methods.

**A** third and more tangential branch of Concentric, called **COGENCY SYNDICATED**, rounds out the core business model with 1/2 dozen proprietary wind, solar, photosynthetic carbon sequestration, apiculture and residual material processing techniques.

In no uncertain terms, there is simply not, nor has there ever been, a more holistic or pure assortment of technologies capable of providing such economically and ecologically advantageous solutions to humanity's essential needs.

These technologies are state-of-the-art in all climates and in all geographies, from Tropical to Arctic and from Jungle to Desert.

By structuring the Concentric business model as an **EFCOM** (Engineer + Finance + Construct + Operate + Maintain) provider, we are far more than an equipment supplier, bank or subcontractor. **We literally become part of the communities we serve and partner with.**

**W**e have coined a term, the “**All Gain Sum**”™ as a better alternative to the proverbial “zero sum game” approach (where it is accepted de facto that one side must lose if the other wins). We think the latter status quo is a lie, and that if orchestrated properly, authentic stewardship is the superior Way of Truth.

Starting with good science, compassionate commerce involving **ENERGY, FOOD, AIR & WATER** really can benefit everyone - All People & The Planet.
