

THE BLOCKCHAIN REVOLUTION

The Financial *Resonance*[®] & How It's Already Starting to Change the World

by J. Garrett Smith, ALB, CC, PE

9TH WAVE TOASTMASTERS

October 2018

FINISHERS TOASTMASTERS

June 2021

INTRODUCTION

Good Evening.

Many of you already know about my devotion to applying Natural Science in pure Energy, Food, Air & Water to solve the world's gravest challenges in hunger and hydration, poverty and pollution.

Tonight, I'm excited to discuss a tool for this focus that is relatively new to me, and will be to each of you, as well : MONEY.

Hold on. Money's not new, of course. But CURRENCY - what IT is, and how it's being used - is in the midst of radical and unprecedented change today.

Whether or not you choose to understand these changes and take advantage of them, the lives of you and your family members will be impacted by them over the coming decades.

See, over a decade ago, in 2008, something most of us have at least heard of - BITCOIN - let the "genie out of the bottle" of CryptoCurrency, a still-nascent market but now with thousands of 'coins', and valued in the trillions of US dollars.

INTRODUCTION {continued}

I'm standing here tonight as someone who has programmed industrial computers to control power generation and water purification plants, but I'm not a "computer nerd". This message is NOT limited to social media junkies or stock *Day Traders*.

JOIN ME AS WE STRIVE TO TUNE IN TO KEY TRENDS.

My goal tonight is to, at least, introduce you to some of the Terminology, and, at best, to explain the remarkable irony of how something so feared - right? ... '*Cryptography Mixed with Currency*' - actually breeds Trust.

This speech is organized into 4 Key Questions, and, hopefully, 4 thought-provoking answers:

- <1> What is Money?**
- <2> Who is the Owner of electronicCOINS?**
- <3> What is Blockchain?, and**
- <4> How can Digital Money Connect to Reality?**

1. What is Money?

At it's root, isn't it "Consensus"?

Right? We VALUE any currency because we BELIEVE that other people will accept it as PAYMENT. All over the world, we trade essentially worthless pieces of paper (called 'fiat') because Governments of Nations guarantee them as "Legal Tender".

Fair enough, but whether you know it or not, YOU PAY for the 'guarantee': "Fees" for the Bureaucracy, "Transaction Costs" for the Trade ... manifest as Inflation, Tariffs, Taxes, etc.

And therein lies The Rub, The Conflict: because Monopolies always seek to Maximize transaction costs, but when costs are reduced, where there is EFFICIENCY, there is *Freedom & Empowerment* to the People.

So, take note: CryptoCurrency is the "*Separation of Money & State*", and so it creates a 'level playing field' for ALL PEOPLE, especially for Developing Nations without modern banking infrastructure.

This Fact is Core to the '*Algorithm of Trust*' - that's why it's Revolutionary, and why it's already changing the world, Financially & Socially.

2. Who is the Owner of electronicCOINS?

So, Next, Who is the Owner of e-Coins?

This is like asking, “Who owns gold?” The answer, of course, is “Whoever has it.” Right?

INTERPRETATION: There’s no way to ‘Stop’ it.

For electronic coins, the owner is the ‘Holder’ of the Secure Digital Record.

There is no ‘centralized bureaucracy’ and its associated politics, strife, venality, avarice, corruption, wars, etc. ... only a Globally-Networked Internet with Massive, Independent & Autonomous computing power to Justly Record Every Transaction.

EFFICIENT • FAIR • TRANSPARENT

Money Without Borders unleashes power to serve the UnBanked. For example, a cleanTECH business in Israel can buy Waste-to-Energy equipment built in Norway, and install and operate it in Ethiopia with Seamless Efficiency and Transparency. See, Liberty, if we align in Resonance with it, is what’s ‘Too Big To Fail’.

OK, now, as NACHO LIBRE would say, let’s get down to the “*Nitty Gritty*”...

3. What is Blockchain?

Blockchain is the software protocol behind cryptocurrency. It is a shared, unchangeable, immutable, secure 'Digital Ledger'. It is based on Programmable, Incorruptible Morality because it creates a single, transparent transaction record with *No Middleman* ... it is uber-efficient and cannot be manipulated.

By Design, Blockchain is Fraud Proof.

Ironically, the fear of the "newness" and "name" of 'cryptocurrency' is, in reality, transcended by the Transparency of Secured Communication & Verification that is "Safely Encrypted", NOT "Fraudulently Hidden".

CryptoCurrency has a built-in Moral Compass. The Accounting Record cannot be faked to deceptively to alter perception. With Blockchain Accounting, damaging financial scandals from early in the 21st Century like the Lehman-Brothers home-mortgage scam and the ENRON energy trade legerdemain with Electricity and Natural Gas, would be impossible.

Blockchain Accountability would prohibit somebody buying a home at one price and the seller recording it at another, and Blockchain Accounting would prevent one division of a company reporting higher gas sales to inflate projections while another division reports lower gas purchases to make electric power generation efficiency look higher. By Design, Blockchain only allows for ONE record, and that record is secure, transparent and immutable.

4. How can Digital Money Connect to Reality?

Staying on the point of Real, Ubiquitous Commodities that we moniker:

- at the CHICAGO MERCANTILE EXCHANGE (CME), “**Cattle, Coffee, Corn & Cotton**”
- by R.E.M. in ♪ *Welcome to the Occupation* ♪, “Sugar Cane & Coffee Cup, Copper, Steel & Cattle”
- on the State Seal of MONTANA, “Livestock, Grain, Mines & Oil”

Hang on to your hats because this is where the volcanic Power of this unstoppable Force is surging out of latency.

What am I talking about? I’m addressing the REAL POLITIC.

This is how Digital Money can not only Connect to Reality, but amplify it.

The Applications of the Vanguard Paradigm Shift have only just begun, with “Natural Asset” or “Commodity” Tokens - eCOINS that are linked to the REAL value of REAL resources and REAL products. The industry has already crafted the legal construct “S.A.F.T.” for Simple Agreement for Future Tokens, as a blueprint.

4. How can Digital Money Connect to Reality? (CONTINUED)

{afterNOTE: In 2015, Ethereum envisioned the *Decentralized Autonomous Organization (DAO)* as a streamlined business construct that, in 2021 was legally adopted by the STATE OF WYOMING [Act No. 73 / SF 0038] with specialized ‘Smart Contracts’ (pre-programmed ‘IF/THEN’ Rule Sets for Proof of Stake, or Ownership) codified in programming languages like Solidity by Ethereum.

In 2022, CONCENTRIC Industries restructured as ConcentricDAO with its offering of NSC[®], Nautilus Stable Coin, in a new, and better S.A.F.T.^{Nth} Power - Stable Agreements for Fungible Tokens - that are backed by Concentric’s contracted revenues from the global deployments of its patented processes for the generation of PURE Energy, Food, Air & Water commodities. The convergence of CONCENTRIC & ETHEREUM represents the future of Stewardship and the simultaneous optimization of ECONOMIC ABUNDANCE + ECOLOGICAL SUSTAINABILITY + SOCIAL JUSTICE + SPIRITUAL FREEDOM.}

4. How can Digital Money Connect to Reality? (CONTINUED)

Imagine ... the Ramifications of a “Brix & MohrTAR”™ company like CONCENTRIC whose “Nautilus” Coin is supported by its proprietary pure Energy, Food, Air & Water on all 7 Continents.

People ANYWHERE on Earth can Build QUALITY OF LIFE with ubiquitous things like clean Water, reliable Electric Power, efficient Heating & Cooling, and Fresh Food WHEREVER they are, with fungible “Tokens” backed by THOSE VERY REAL COMMODITIES.

Imagine ... a Valparaiso, Chile metals manufacturer can recover the cost of environmental controls at their factory because they deal directly in “*Refine Coin*” with construction contractors along the New Silk Road in Central Asia ... an Ivory Coast plantation can provide living-wages to its employees with the savings from the reduced fees when they take payment in “*AgriMint*” from the Swiss chocolate processor ... a mother in Kolkata, India can finally provide her child with needed medicine on-time because the Singapore-based nutraceutical manufacturer processes “*HealthStamp*” in minutes instead of days or weeks ...

4. Conclusion

These are just a few of the Harbingers of what GEORGE GILDER of the Discovery Institute calls the “Cryptocosmic Explosion” of Creativity, Learning, Knowledge, Risk-Taking, Re-Investment, and Sustainable Thriving.

Welcome to the InDAOstrial Revolution.

CryptoCurrency Plus Blockchain backed by Real Commodities RESTORES the Freedom to Create to the Individual & Resonates with the Ingenuity of the Human Spirit.

Every New Day opens the opportunities for the Possible.

POSSIBILITY IS THE FUTURE.

AND THE FUTURE IS NOW.

Thank You & Good Evening.
