

The Future Is Asian

© 2019 by *Parag Khanna*

A clinical textbook on the whole world, in real time.

Khanna, Managing Partner of FUTUREMAP, and named one of *Esquire's* "75 Most Influential People of the 21st Century", begins this important work by "re"introducing a History of The World, a history that has, of course, been predominantly Asian.

His ensuing strategic geo-economic survey from Africa through Oceania encompasses all of Asia, and its global impact throughout Europe and the Americas.

In this expose on latent forces already too salient to ignore, like the ASIAN INFRASTRUCTURE & INVESTMENT BANK's (AIIB) "BELT & ROAD INITIATIVE" (BRI), Khanna declares that "The Future Is Asian, and future winners will be whoever best scales new technologies and business models."

A 21st Century Tour-de-Force on trends in Geo-Politics and "Technology & Society", and the Performance-based 'Moral Meritocracies' that are shaping the world of tomorrow, today.

An indispensable work if you want to be in the game.
